- AB - WO9709964 Non-toxic oil-in-water or biocontinuous microemulsion as a vehicle for admin. of one or more active cpds. of low water solubility comprises:(a) a polar phase contg. water and opt. an agent for obtg. isotonic conditions and one or more components (modifiers) for adjusting the polarity of the polar phase; (b) a surfactant film modifier; (c) a non-polar phase comprising at least one pharmaceutically acceptable oil; and (d) a mixt. of a hydrophilic surfactant and a hydrophobic surfactant up to 15 wt.% of the total compsn. selected from lecithin, sphingolipids and galactolipids.
- USE - The compsn. is used for parenteral, oral or transdermal administration of active agents. The active agent is eg. a proton pump inhibitor, calcium channel blocker, beta blocker, anaesthetic, steroid, antioxidant, renin inhibitor, alkaloid, cytostatic, anti-coagulant, lipid regulating agent, anti-depressant, neuroleptic, immunosuppressant, immunomodulator, antibiotic or anti-inflammatory agent.
- ADVANTAGE - The compsn. is non-toxic and increased the solubility of the active agents.
